

Mr. David Hedgpeth's **'Easyride'** saddle is a dream come true and a lifesaver. Over the last decade, I had knee surgery on both knees; and my enjoyment and love of pleasure riding became physically painful. I could only sit in the saddle for approximately an hour before having to dismount due to the pain in my knees. Several methods were tried, repeatedly, to soften the saddle's leather and conform the positioning of the stirrups.

Luckily, I attended the Equus Fest in Springfield, Missouri, and visited the booth of Hedgpeth Saddlery. I was truly amazed at the extreme softness of the saddle's leather, and purchased one. Since that time, riding has returned to being a pleasure. Instead of spending only an hour in the saddle, I can ride all day-all day without any discomfort nor pain in my surgically-repaired knees. I would personally recommend, especially for anyone who has had knee surgery (and experiences pain and discomfort from their current saddle), to try one of Mr. David Hedgpeth's **'Easyride'** saddles.
